TRADE LIST

Spring, 1915

CUSTOMERS are requested to state the mode of conveyance by which they desire their trees forwarded, When no route is named, we forward to the best of our judgment, without liability for error or delay.

RESPONSIBILITY.—After goods are placed on board cars here, we assume no responsibility for their safe or prompt delivery, or any injury caused by delay in delivery by the transportation company.

ALL CLAIMS must be made upon receipt of goods.

TERMS CASH, on or before delivery to express or railroad agents, unless by special arrangement.

Two hundred and fifty, twenty-five or five of any one variety will be furnished by the thousand, hundred and ten rates, respectively, but single plants of one or more varieties will not be sold at less than 15 cents each, except Vines and Herbaceous Plants, the minimum price of which will be 10 cents each.

PACKING CHARGED EXTRA, but only sufficient to cover cost of time and material consumed in the work.

POST OFFICE ORDERS payable at Dresher P. O., Montgomery County, Penna.

WESTERN UNION TELEGRAPH, AMBLER, PA. Use Nurserymen's Telegraphic Code or "A B C" Code, 4th edition.

VISITORS are always welcome and should take train at the Reading Terminal, 12th and Market Streets, Philadelphia, for **Camp Hill Station**, or at Broad Street Station, Pennsylvania R. R., for **Fort Hill Station**. Be sure that the train stops at these stations.

NOTICE.—It is necessary that you should **TELEPHONE** us (Bell Phone, Ambler 226-W; Keystone Phone, Jenkintown 652-Y), in advance of your coming, so that we can send a carriage to the station for you. Our office is 2½ miles from either station.

CERTIFICATE OF INSPECTION

Our nurseries are inspected several times each year, by inspectors of the Entomological Division of the Department of Agriculture of the State of Pennsylvania, and are free from insect pests and diseases. A certificate of the Department is attached to all shipments, and will also be furnished to customers if desired.

Deciduous Trees

It is an old saying that "The best is the cheapest in the long run" and this applies probably more nearly to nursery stock than any other thing. The difference in price between a poor tree and a good tree is comparatively little, only a few cents, but the results cannot be measured in dollars and cents.

Our trees are frequently transplanted, to establish a good root system, they are "staked" so that every tree is grown with a perfectly straight trunk and the heads of the trees are kept pruned into symmetrical shape. Our soil is heavily fertilized and the trees are given constant cultivation and no effort spared to produce the very best quality. These facts should all be taken into consideration when comparing our prices with those of other nurseries.

Norway Maples

Our Norway Maples all have good, straight trunks and branched just right for street planting. They have been several times transplanted and have good fibrous roots.

See Price List of Specimen Trees, Page 18.

Japanese Maples

"American Grown" is a very fitting remark at this time, and it is particularly suited in connection with our Japanese Maples which are all "Pennsylvania grown." Why buy cheap, uneven, hide-bound foreign stock when you can get the very best here at reasonable prices and every plant guaranteed true to name.

A NOVEL PROPOSITION.

Here is a proposition we made last Spring, and on the strength of it, several large orders were placed with us.

"If you knew that you could get Sweet Gums, a hardy strain, grown from seeds collected as far north as Philadelphia, and get 90 to 100 out of every 100 to grow, would it interest you?"

The great objection to using Sweet Gums is the difficulty of getting them to grow. It is the most beautiful tree in cultivation, either as a specimen lawn tree, or for street planting. It would be largely used if successful transplanting could be assured.

We can dig our Sweet Gums with a solid ball of earth sewed in burlap, reducing risk of transplanting to a minimum. See illustration.

Following letter is interesting:

Grand Rapids, Mich.,

December 14, 1914.

Thomas Meehan & Sons.

Gentlemen:—

The 50 Sweet Gums, 8 to 10 ft., purchased of you last Spring, balled in burlap, arrived in the very best possible condition, every tree having made a very substantial growth during the Summer. Every tree is alive.

Very truly yours,

Eugene V. Goebel,
Supt. Parks.

Illustrates how we Ball and Burlap Sweet Gums

When ordering trees be sure to say if you want them balled, as we also offer them dug without ball at regular list price.

Cost of packing trees in bales or boxes would be additional. If sufficient quantities are taken to warrant shipping in car, the freight would be proportionately less, and the cost of box and packing would be saved.

Meehan's Globe Head Mulberry

Entirely new and now introduced for the first time.

It is as hardy as the Tea's Weeping Mulberry and more attractive and better than Catalpa Bungei.

Supply for this year limited. Place your order early to insure delivery.

Price, two year heads \$1.25 each.

Tilia Dasystyla (Euchlora) Yellow Twigged Linden

The yellow-twigged or Crimean Linden is a tree which in the past has been little used for street planting. Four years ago we induced the Shade Tree Commission of East Orange, New Jersey, to plant one street with these trees to prove their desirability for this purpose. In a letter recently received from Mr. Ernest H. Bennett, Supervising Foreman for the Commission, he writes "the trees were planted in the Fall of 1911, on Kenwood Place. There are in all seventy-five trees in perfect condition, not having lost a single tree. The trees are very uniform in size and make a beautiful showing, and I predict that this will be one of our most beautiful streets, they are so regular in their growth. We feel proud of our trees."

The tree is very symmetrical in its growth. The foliage is light green with bright shiny surface, remaining on the tree without changing color until late in the fall.

Tilia Europaea, European Linden

Our stock of European Lindens in the 3 to 3½ and 3½ to 4 inch calliper grades consists of about twelve hundred trees, all of which, have been transplanted within the last three years. Every tree has a perfectly straight trunk, a well developed head, and is branched from six to seven feet from the ground. They are perfect trees for street planting.

Virgilea lutea, see Cladrastis**THOMAS H. DESMOND,****Landscape Designer****731 MAIN ST., HARTFORD, CONN.**

Member of the American Society of Landscape Architects

October 26, 1914.

Thomas Meehan & Sons,
Dresher, Pennsylvania.

Gentlemen:—

The trees and shrubs which you shipped to Simsbury, on my order, have been received and are planted. I wish to express the entire satisfaction of both my client and myself with the quality of the goods and the thorough packing. Without question it is the best looking shipment of goods of this class that it has been my pleasure to handle. Had it been otherwise I should not have hesitated to advise you, and therefore feel it is only fair to let you know it was entirely satisfactory.

Very truly yours,

THOMAS H. DESMOND.

Specimen Shade Trees

This is a particularly fine lot of Specimen Shade Trees for planting for immediate results. These trees were transplanted four years ago and set ten by ten feet apart in nursery rows, allowing ample room for top development. They are abundantly supplied with fibrous roots, have good straight trunks and well developed, symetrical tops. They are mostly branched from six to eight feet from the ground.

When ordering from this list be careful to mention these "specimen trees."

Mr. John W. Hutchison, Purchasing Agent, Central Park, N. Y., after inspecting and purchasing one hundred of our Specimen Norway Maples, told us that our block of these trees was the finest and most perfect and uniform lot of Norway Maples on the market today. They are planted ten by ten feet apart, have perfectly straight stems, of even height and all evenly branched from the ground.

Deciduous Shrubs

Some people have an idea that "shrubs are shrubs." They are, but there is a big difference in the character of the stock and it is this that fixes their value. Some shrubs are grown very thickly in the nursery rows, they can be grown very cheaply because a great many more can be grown on an acre than if they are given more room, but it is done at a sacrifice to the plants. We set our shrubs wider apart in the nursery rows than is usually practiced by nurserymen. This gives the plant more room to develop and a bushier shrub is the result. This fact should be kept in mind when comparing prices.

Evergreens

See Also Evergreen Shrubs

In no other class of nursery stock are prices usually so deceptive as they are in evergreens, because the height shown in the list gives no idea of the quality. Quality is represented by the bushiness of the plant and the number of times it has been transplanted, because transplanting is what produces the fibrous root system, so all important to an evergreen. Good feeding is also necessary to impart health, vigor and the rich color to the foliage.

Our aim is to produce the best. Health, vigor, good color and an abundant root system, and to accomplish this, we transplant our evergreens every two years into new, heavily manured ground.

All evergreens are dug with ball of earth and the ball sewed in burlap. The cost of this is included in the price quoted in the catalogue.

250	00	
275	00	

Abies Veitchii is a Japanese Fir, thoroughly tested and found to be perfectly hardy in the United States and is one of the finest evergreens. In form of growth it is like the Silver Fir. The under side of the foliage is a silvery-grey which imparts a soft, handsome tone to the plant.

Cedrus Atlantica glauca, Mt. Atlas Cedar

“ Deodara, Deodar Cedar		
3 to 4 ft.	15	00
“ Libani, Cedar of Lebanon		
3 to 4 ft.	15	00

All evergreens balled and burlapped at the prices listed.

Juniperus Chinensis

This is one of the finest and most hardy of all the Junipers. It is of upright habit and dense in its growth. It possesses a dark green color, which does not change during the winter, but keeps just as green as it is in summer. This is a distinct advantage. It is useful for filling in evergreen beds.

Junipers for Ornamental Planting

Throughout the entire list of Evergreens there are none so useful as the Junipers. First they have the advantages of hardiness, and adaptability to almost all soils and situations. Then they have a character all their own, and the great diversity of color of foliage makes it possible to plant an entire bed or group of them without the use of other species which may not be as hardy or satisfactory. We have gradually been extending our plantings of these Junipers until now we believe we have one of the largest and finest collections in any nursery in this country.

All evergreens balled and burlapped at the prices listed.

Juniperus

Chinensis argentea variegata

This is one of the hardiest of the Junipers and used largely for massing in evergreen beds. It has a compact and symmetrical habit. The foliage is of light green color, tipped here and there with yellowish white variegation. We consider this one of the best of the Junipers of this form of growth.

Juniperus Canadensis, Canadian Juniper		Per 10	Per 100

4 to 5 ft.		20 00	
6 to 7 ft.		40 00	
" Chinensis aurea, Golden Canadian Juniper			
2½ to 3 ft.		17 50	

This is not the spreading variety of golden Juniper. It is of upright habit. The spreading form is the communis aurea.

All evergreens balled and burlapped at the prices listed.

Juniperus Chinensis Pfitzeriana

This is without a doubt the most beautiful and graceful of all evergreens. It seems almost impossible to describe its beauty, and we must let the illustration speak for itself. The color of the foliage is dark green without shade or variegation of any sort. It is perfectly hardy anywhere in this country. We have unquestionably the largest stock of this wonderful evergreen in the United States.

All evergreens balled and burlapped at the prices listed.

Juniperus Sabina tamaricifolia

There are but few varieties of Creeping evergreens, and none so good as the *Juniperus tamaricifolia*. It creeps almost on the ground and is useful for rockeries or for planting edges of evergreen beds. The foliage is rich green with here and there a silvery tint. It is not a coarse grower like the *Juniperus recurva squamata*.

Juniperus (Cont.)

Per 10 Per 100

" *Neaboriensis*

2	to 2½ ft.	15	00
2½	to 3 ft.	17	50
3	to 3½ ft.	20	00
3½	to 4 ft.	22	50
4	to 5 ft.	25	00

The *Neaboriensis* is a variety little known, but of no less merit. The habit is more open and spreading than the *chinensis* and is quite distinct. It is an excellent sort for massing in evergreen beds where a large growing sort of spreading habit is required.

Juniperus Virginiana glauca
Blue Red Cedar

Everyone knows the Native Red Cedar, and there is no evergreen which just fills its place in landscape planting. This is a handsome variety of it, with steel blue foliage. Its hardiness extends to any part of the United States and Canada. We have probably the largest stock of this Blue Cedar in this country.

All evergreens balled and burlapped at the prices listed.

Juniperus Virginiana tripartita

The *Juniperus tripartita* is valuable as being unique in its character of growth. While the tendency of the centre stems is upright the side branches have almost a horizontal growth. In summer the foliage is green but as winter sets in it turns to a purplish-green color, which is quite attractive.

Retinispora Plumosa Aurea

The beautiful golden *Retinispora* is almost indispensable in evergreen planting. While of fairly rapid growth it may be kept any size desired by constant shearing, and this shearing adds to its beauty as the golden color is brightened on the new and young growth. We have a large stock of this magnificent evergreen, and in large sizes.

Hardy Herbaceous Perennials

Ornamental Grasses and Ferns

Our Herbaceous Department is in charge of experts, men who are thoroughly trained in the growing, handling and shipping of these popular plants. By a thorough system of propagation and transplanting our stock is kept in the highest state of perfection, so that every plant we send out is young, vigorous and brought to a condition where it will give the customer the best results.

In making comparison of our prices with those of other nurseries bear in mind the fact that our plants are mostly field grown clumps and not the small divisions usually supplied by other growers.

July to September, etc., indicates the period of flowering.

RAFFIA

We are the largest direct importers of Raffia in the country. We know the Raffia business thoroughly from beginning to end. We know the brands that are dependable and those that are doubtful. We handle only the good dependable brands and being large buyers, we get the best price. We are head-quarters for Raffia, and can serve you to your satisfaction and advantage.

We offer two brands of Raffia that are adapted to nursery-men's use.

"RED STAR BRAND" RAFFIA

"RED STAR BRAND" is the best all around grade of Raffia on the market. It is a guaranteed quality and at a most reasonable price. It is known as the Nurseryman's favorite brand.

1 lb. and up @ 20c. per lb.	100 lbs. and up @ 11c. per lb.
10 lbs. and up @ 17c. per lb.	1 bale and up @ 9c. per lb.
25 lbs. and up @ 14c. per lb.	2 bales and up @ 8½c. per lb.
50 lbs. and up @ 13c. per lb.	5 bales and up @ 8¾c. per lb.

A bale of Raffia will weigh about 225 lbs.

"X X SUPERIOR" RAFFIA

"XX SUPERIOR" represents the best grade of Raffia obtainable, strands are exceptionally long, strong and good color. It is for use where the very best raffia is necessary.

1 lb. and up @ 22c. per lb.	100 lbs. and up @ 12c. per lb.
10 lbs. and up @ 18c. per lb.	1 bale and up @ 9½c. per lb.
25 lbs. and up @ 15c. per lb.	2 bales and up @ 9¼c. per lb.
50 lbs. and up @ 13½c. per lb.	5 bales and up @ 9c. per lb.

SMALL STOCK FOR PLANTING IN NURSERY ROWS

We have in Stock about Two-hundred thousand Good Rooted Cuttings and Seedlings of

Ornamental Trees, Shrubs and Vines

in complete assortment of varieties. A special price list of these is issued and will be mailed to applicants.

TREE AND SHRUB SEEDS

FOR OVER FIFTY YEARS WE HAVE BEEN COLLECTING AND OFFERING TREE SEEDS TO NURSERYMEN. CATALOGUES ISSUED IN THE FALL. WE STILL HAVE SOME VARIETIES OF SEEDS WHICH ARE SUITABLE FOR SPRING PLANTING. SEND FOR LIST.

Meehan's Mallow Marvels

SINCE the introduction of our Mallows several years ago, thousands of them have been widely distributed over the entire country and have given the utmost satisfaction. They are now specified in planting lists by Landscape Engineers, Superintendents of Parks and Cemeteries.

It makes a vigorous growth—strong roots making a bushy clump five to seven feet in one season and blooming profusely from midsummer to frost. Being an herbaceous plant it dies to the ground in the fall, shooting from the root again the following spring.

The flowers measure from eight to twelve inches in diameter, and are sold in separate colors, in red, pink and white.

The plant is extremely hardy, having been tested and grown in all parts of the United States and Canada.

It grows naturally in moist ground but thrives equally as well in any good, rich soil.

Beware of Imitations offered under other names.

Shade Tree Commission.

CITY OF EAST ORANGE, NEW JERSEY

Aug. 24, 1914.

Thomas Meehan & Sons,
Dresher, Pa.

Gentlemen:-

I am sending you some photos I have just lately made of the Yellow-twigged Lindens, as they will convey to you the true appearance of these trees better than anything I can possibly say. The trees were furnished by you and planted in the Fall of 1911, on Kenwood Place. There are seventy five trees, in perfect condition, not having lost a single tree. The trees are very uniform in size and make a beautiful showing, and I predict that this will be one of the most beautiful streets in East Orange.

Yours very truly,
(Signed) Ernest H. Bennett,
Supervising Foreman.
